

Our Commitment to Quality Assurance

Indiana LASIK Center is fully committed to providing the highest attainable quality of Laser Vision Correction.

To ensure that every patient enjoys the best chance to reach their visual goals, we pledge to employ the following safety measures:

1. **ALL LASIK** procedures will be performed utilizing a qualified team of highly specialized surgical personnel. If a member of that team is unable to perform his or her duties due to illness or other cause, all LASIK procedures will be rescheduled to a time when the surgical team member or a qualified replacement is available.
2. **ALL LASIK** procedures will be performed utilizing state-of-the-art laser and ancillary equipment. All equipment will be optimally functioning at or beyond the manufacturer's specifications. If at any time the highly sophisticated instruments are less than full operational, all LASIK procedures will be rescheduled to a time when all equipment is again functioning optimally.

Ronald K. Norlund, O.D.
Medical Director
